By Monday Morning on September 4, Only 64,000 Customers Still without Power in Southern California

Increased demand due to high temperatures strained the power grid causing hundreds of thousands of customers throughout the region to lose power at one time or another over the Labor Day weekend. According to Reuters, by early morning on September 4, the outages had been reduced to approximately 64,000. Southern California Edison accounted for more than 33,700 of the outages, Los Angeles Department of Water and Power 26,000 and San Diego Gas and Electric 4,566. Over the course of the weekend, SoCal Edison reported that some 538,000 customers lost power and San Diego Gas & Electric reported 85,000 customers out of power; the cumulative outages for the LADWP were not available.

Spectra Energy Announces Expansion Plans to Meet Northeast Market Needs

Spectra Energy announced plans to develop new infrastructure to move natural gas into and through the northeastern portion of the U.S. Spectra's East-to-West Project includes an expansion of the Algonquin Pipeline system to serve the LNG import facilities along the Atlantic Coast by providing the ability to reverse the flow of the line. In addition, the project will establish interconnects with Texas Eastern Pipeline and Maritimes & Northeast Pipeline, and four other interstate pipelines. The project is anticipated to be in service by November 2009.

Weakening Hurricane Felix Poses Little Threat to Oil and Gas Assets in Gulf of Mexico September 4

Hurricane Felix took a southward turn away from the Gulf of Mexico to make landfall on the northeastern coast of Nicaragua today. According to forecasts released from the National Hurricane Center at 17:00 September 4, Felix is expected to dissipate within the next 36 to 48 hours. Natural gas prices opened 16 to 18 cents lower this morning in view of Felix's southern path. Pemex had announced that it had not evacuated any workers from its offshore assets in the Bay of Campeche.
