Update: Entergy Unlikely to Build New Nuclear Power Units in U.S. Southeast—CEO

Entergy is unlikely to construct new nuke units in the short term at its River Bend, Louisiana or Grand Gulf, Mississippi nuclear power facilities, the company's Chief Executive said on November 3. "It's not off the table, but the economics are really not supportive and not likely to be supportive in the near future," he said. Entergy had applied for licenses with the Nuclear Regulatory Commission (NRC), but postponed those applications in 2008, he said.

Explosion, Fire at Silver Eagle's 10,250 b/d Woods Cross, Utah Refinery November 4

A pipe release triggered an explosion and fire at Silver Eagle Refining's 10,250 b/d Woods Cross, Utah refinery on November 4, but responders extinguished the blaze and the facility continued to operate, news sources said. The incident did not cause any injuries, a news source reported. Crews were waiting for tanks to cool off before starting repairs, according to another source. The explosion appeared likely to blame for a power outage that briefly forced shut parts or all of three other area refineries: Chevron's 45,000 b/d Salt Lake City facility, Holly Corp.'s 25,050 b/d Woods Cross site, and Flying J's 29,400 b/d North Salt Lake City location.

Power Failure Forces Brief Shutdowns at Three Utah Refineries November 4—Companies Begin Restarts within Hours

A power failure briefly forced shut parts or all of Chevron's 45,000 b/d Salt Lake City refinery, Holly Corp.'s 25,050 b/d Woods Cross refinery, and Flying J's 29,400 b/d North Salt Lake City refinery in Utah on November 4, a news source said. The companies began restarting the affected units within hours, according to the source. An explosion at a nearby refinery—Silver Eagle Refining's 10,250 b/d Woods Cross facility—appeared to have caused the power blip, based on multiple reports.

Marathon Shuts Unit after Power Failure at 76,000 b/d Texas City, Texas Refinery November 3

Marathon shut a gas condensate depropanizer after a power disruption at its 76,000 b/d Texas City, Texas refinery on November 3, the company said in a filing with state regulators. The power blip led to the "closure of emergency isolation valves to storage spheres" and triggered flaring. It was not clear if the incident had any impact on production.

Devon Plans 30,000-plus b/d Jackfish 3 Oil Sands Project in Alberta, Canada

Devon plans to submit a regulatory application in 2010 for a third, 30,000-plus b/d phase at its combined, planned 100,000-plus b/d Jackfish oil sands location in Alberta, Canada, it said in a quarterly report. The company expects to produce 35,000 b/d at Jackfish 1 by the end of 2009, and begin production at its proposed 35,000 b/d Jackfish 2 in 2011. The Jackfish site holds about 900 million barrels of recoverable reserves, Devon said.

U.S. Oil Production to Peak at 7.35 Million b/d in 2011/2012—U.S. Oil and Gas Report

U.S. oil production is forecast to peak at 7.35 million b/d in 2011/2012, according to the latest U.S. Oil & Gas Report. The United States will, by 2013, account for 89.52 percent of North American oil demand and 65.75 percent of supply. North American oil imports will decline from 11.74 million b/d in 2008 to 10.89 million b/d in 2013.
