Tropical Storm Dolly Situation Report # 1
July 22, 2008 (3:00 PM EDT)

Highlights:

- As of 2:00 PM EDT, Tropical Storm Dolly is located 195 miles southeast of Brownsville, TX with maximum sustained winds of 70 mph and is moving toward the northwest at 10 mph. On this track, Dolly’s center is expected to make landfall in northeastern Mexico or extreme southeast Texas tomorrow (July 23).

- As of 12:30 PM EDT, July 22, the Minerals Management Service (MMS) reports 395 million cubic feet per day of the Gulf’s natural gas production have been shut-in, equivalent to 5.1 percent of the production. MMS reports 60,621 barrels/day of the Gulf’s crude production has been shut-in, equivalent to 4.7 percent of the Gulf’s crude production. A total of 49 production platforms, or about 6.8 percent of the Gulf’s 717 manned platforms, have been evacuated. Personnel from six rigs, approximately 4.9 percent of those operating in the region, had been removed.

ESF 12 Actions:

- On July 22, 2008 ESF-12 personnel began staffing the FEMA Region VI Regional Response Coordination Center (RRCC) in Denton, TX and the National Response Coordination Center (NRCC) in Washington, DC.
