Notes:
Total state customers are based on 2006 EIA Customer Data.
Note: due to a large number of service providers, including investor owned utilities and cooperatives, the number of customer outages reported may not be comprehensive.

Source:
Crude Oil and Natural Gas Production Data from Minerals Management Service.
Refinery Status confirmed by company or on company web site and through various trade press sources.
* % capacity out represents percent of production capacity in the Gulf of Mexico.

Highlights:

- As of 8:00 AM EDT September 18, there are an estimated 2,444,134 customer without power in the States where largest outages due to Ike remain (see summary table above) plus an additional 2,058 remaining outages in New York and Arkansas. Power is restored to nearly all customers in Illinois, Missouri, and West Virginia. Largest outages remain in Texas where 1,637,268 customers are without power. Across all states affected by Ike, power has been restored to approximately 549,000 customers since Ike Situation Report No. 8.

- On September 17, EPA issued an emergency waiver through September 30, of the Reformulated Gasoline (RFG) requirements in Kentucky in the counties of Boone, Campbell, Jefferson, Kenton, and those parts of Bullitt and Oldham where RFG is required. On September 17, EPA also issued an emergency waiver through October 1, of the Reid Vapor Pressure (RVP) and RFG requirements for parts of eastern and coastal Texas. This waiver supersedes the September 11 multi-state waiver as it applies to Texas.
On September 15 the U.S. Department of Energy announced it would deliver 250,000 barrels of emergency oil from the Strategic Petroleum Reserve to Marathon Petroleum Company’s Midwest refineries along the Capline pipeline system. On September 16, DOE announced it would deliver an additional 239,000 barrels of emergency exchange oil from the Strategic Petroleum Reserve to Conoco Phillips Company’s Wood River refinery along the Capline pipeline system.

As of 12:00 AM EDT September 18, the Port of Corpus Christi has limited vessels to drafts of less than 20 feet in the Matagorda area. The Ports of Freeport, Galveston, Texas City, and the Houston Ship Channel are open at all times to vessels with a draft of less than 16 feet and open to deep draft vessels only during daylight hours. Vessels going through the rivers and channel into the Port Arthur area are limited to drafts of 30 feet or less at night and 36 feet for daylight. The Gulf Intracoastal Waterway is still closed from the Houston Ship Channel, west to the Port Arthur, TX bridge and has closures in LA as well. The Calcasieu Channel is limited to vessels with drafts of less than 39 feet for daylight transit and only 16 feet at all other times. The Lower Mississippi River is restricted to daylight transit only for vessels with drafts of 30 feet or less

ESF 12 Actions:

- ESF-12 is staffing the FEMA Region VI Regional Response Coordination Center (RRCC) in Denton, TX, the FEMA Region VI Joint Field Office (JFO) in Austin, TX, the FEMA Region VI (JFO) in Baton Rouge, LA, the Region V RRCC in Chicago, IL, and the National Response Coordination Center (NRCC) in Washington, DC. In addition, a petroleum expert has been deployed to San Antonio, TX to serve as part of FEMA’s National Incident Management Assistance Team (IMAT) and an electricity expert has been deployed to join the Region IV IMAT in Houston, TX.

Source: Minerals Management Service

As of September 17, the Minerals Management Service (MMS) reports 6,087 million cubic feet per day (MMcf/d) of the Gulf’s natural gas production remains shut-in, equivalent to 82.3 percent of the Gulf production. MMS reports 1,246,470 barrels/day of the Gulf’s crude production remains shut-in, equivalent to 95.9 percent of the Gulf’s crude production. A total of 425 production platforms, or 59.3 percent of the Gulf’s 717 manned platforms, remain evacuated. Personnel from 50 rigs, representing 41.3 percent of those operating in the region, remain evacuated.
• MMS reports that Hurricane Ike destroyed 28 of the 3,800 offshore production platforms in the Gulf. MMS estimates that the platforms which were destroyed produced a total of 11,000 barrels/day of crude and 82 MMcf/d of natural gas. As of 6:30 PM September 16, Shell reported that repair work was needed at some of their Eastern Gulf of Mexico platforms (Mars, Ursa, West Delta 143 and Cognac) damaged by Hurricane Gustav. Shell is using this downtime to complete regular maintenance at several of these facilities. Assessments continue at Shell’s Central Gulf Gathering System and Western Gulf systems. As of September 16, BP and ExxonMobil report minimal damage to their offshore facilities. ConocoPhillips reports no damage to its offshore facilities.

• On September 17, the Louisiana’s Department of Natural Resources reports that 28,874 b/d or 19 percent of the normal Louisiana oil production has been restored. Operators in 17 parishes and in State offshore areas normally produce 155,767 barrels/day (the numbers are in addition to MMS reports of Federal offshore production). Shut-in oil production is 96,486 b/d or 62 percent of the normal production; the status of remaining 33,405 b/d is unknown. The estimated amount of restored gas production is 428 MMcf/d or 26 percent of the daily gas production capacity, which is 1,642 MMcf/d. The estimated amount of shut-in gas production is 900 MMcf/d; the status of the remaining 312 MMcf/d has not been confirmed.

• Major crude pipelines originating in Texas and Louisiana shut down operations in advance of Hurricane Ike, and many have terminals at the origin that remain shut. Capline and LOOP reported on September 16 that they are operating near normal rates. Colonial pipeline reported at 7:30 PM EDT September 16 that the main lines and several stub lines are operating. Colonial is receiving supplies from LA refineries and terminals in Texas and anticipates supply from restarted Corpus Christi refineries and marine deliveries. Despite some difficulties at the origin, NuStar pipeline is operating its product line at normal levels. (See table below.)

As of 9:00 AM EDT September 18, twelve refineries in Texas and Louisiana remain shut down due to Hurricane Ike. These refineries located in Lake Charles/Port Arthur and Houston/Texas City, and have a total operable capacity of 3.0 million b/d. (See table below.)

Note: The table does not include all refineries in the PADD III, Gulf Coast Region. Storm column indicates hurricanes impacting refineries: G = Gustav; I = Ike, G+I = Both storms, and - = no impact. Sources: Confirmed by company or on company web site. Various trade press sources.
• As of 8:00 AM EDT September 18, there have been additional reports of damage to multiple natural gas gathering and offshore systems and Force Majeures’ remain in effect as shown in the table below. Pipelines, producers, and processing plant operators continue to investigate the impacts to their facilities from the storms. Restricted access to roads due to flooding has delayed many operators on returning the appropriate amount of crews to complete assessments and repairs to their facilities at this time.

• As of 6:25 PM EDT September 17, Tennessee Gas Pipeline (TGP) reports that there are leaks on the East Leg mainlines of its Blue Water system. TGP declared a Force Majeure and all gas flow through the Blue Water system was shut in on September 13. Enbridge Pipelines which owns and operates UTOS, Garden Banks, Manta Ray, Mississippi Canyon, Nautilus, and Stingray remain shut in. Inspections continue and more thorough damage assessments will take place over the next few days. Mississippi Canyon is the only Enbridge Pipeline that has reported an expected date of return to service for Sunday, September 21. There is no estimate of return to service for the other pipelines at this time.

• As of 9:15 AM EDT September 17, Spectra Energy reports that there is no significant damage or effects to their facilities due to the two Hurricanes and anticipates that the remaining inspections will be completed by the end of this week. Spectra owns and operates the Texas Eastern Transmission pipeline as well as joint venture in DCP Midstream which operates multiple gathering and processing plants in the Gulf Coast area.

• There are 39 major natural gas processing plants in the path of Hurricane Ike with a total operating capacity of 17.7 billion cubic feet per day (Bcf/d).\(^1\) As of 8:00 PM EDT, September 17, the Energy Information Administration (EIA) has confirmed that 14 plants remain shut down which includes those plants still impacted from Gustav, totaling an operating capacity of 7.15 Bcf/d (approximately 40 percent of the capacity in Hurricane Ike’s path). In addition, EIA reports that 17 plants have resumed operations at reduced or normal levels totaling 6.70 Bcf/d operating capacity and 7 plants are capable to restart totaling 3.61 Bcf/d operating capacity once power is restored or upstream gas flow commences.

\(^1\) The Waskom processing plant operating capacity is 270 MMcf/d and not 150 MMcf/d as reported earlier.
### Force Majeure / Critical Notice Posting by Natural Gas Pipelines as of 9/18/08 8:00 AM EDT

<table>
<thead>
<tr>
<th>Pipeline Name</th>

</thead>
<tbody>
<tr>
<td>ANR Pipeline Co.</td>
<td>9/17/08</td>
<td>Force Majeure has been declared Wednesday, Sept 17 - ANR’s offshore facilities in Eugene Island Block 296 sustained damage resulting in zero flow at all receipt points along this portion of the system.</td>
</tr>
<tr>
<td>Chandeleur Pipeline Co.</td>
<td>9/16/08</td>
<td>Operationally Scheduled Volumes indicates pipeline is flowing at 75% of pre hurricane levels.</td>
</tr>
<tr>
<td>Columbia Gulf Transmission</td>
<td>9/14/08</td>
<td>Flow from offshore points has been reduced to approximately 20% of normal operating capacity.</td>
</tr>
<tr>
<td>Destin Pipeline Co.</td>
<td>9/15/08</td>
<td>Pascagoula processing plant declares Force Majeure Monday, Sept. 15.</td>
</tr>
<tr>
<td>Discovery Gas Transmission</td>
<td>9/17/08</td>
<td>Offshore receipts remain unavailable pending assessments; some onshore receipt &amp; delivery pts accepting gas flow at reduced levels.</td>
</tr>
<tr>
<td>Enbridge (UTOS)</td>
<td>9/17/08</td>
<td>Onshore facility Station 44 sustained water damage and evaluations of asset are underway.</td>
</tr>
<tr>
<td>Garden Banks Gas Pipeline</td>
<td>9/17/08</td>
<td>Crews on site continuing damage assessment – minor damage visible. There is power generation but communication equipment is not functional.</td>
</tr>
<tr>
<td>High Island Offshore System</td>
<td>9/16/08</td>
<td>Force Majeure from Sept 10 remains in effect until evaluation of facilities is completed.</td>
</tr>
<tr>
<td>KinderMorgan (Texas &amp; Tejas)</td>
<td>9/17/08</td>
<td>Force Majeures remains in effect from Friday, Sept 12 All firm storage customers can resume injections at 50% of their firm injection rights until further notice</td>
</tr>
<tr>
<td>Manta Ray Offshore Gathering</td>
<td>9/17/08</td>
<td>Assessments continue on offshore platforms and facilities and repairs have started.</td>
</tr>
<tr>
<td>Mississippi Canyon Pipeline</td>
<td>9/17/08</td>
<td>West Delta 143 platform is unavailable for gas flow. Venice plant has experienced water damage and will not accept gas. Alternate means to bypass plant to other processing plants and/or pipeline interconnects is being analyzed. Expected to be back in service by Sept 21.</td>
</tr>
<tr>
<td>Natural Gas Pipeline Co of America</td>
<td>9/16/08</td>
<td>Force Majeure declared Thursday, Sept 11. Compressor Stations 342, 346, 302, 343 remain shut down in TX and LA. A leak was discovered during evaluation of Station 342 and pipeline section has been isolated.</td>
</tr>
<tr>
<td>Nautilus Pipeline Co.</td>
<td>9/17/08</td>
<td>Assessments continue and reports of the Burns Point location on system are intact with minor repairs needed. Downstream processing is ready once gas flow commences.</td>
</tr>
<tr>
<td>Sabine Pipe Line (Henry Hub)</td>
<td>9/16/08</td>
<td>Force Majeure has been lifted for certain points along the system. Henry Hub is accepting gas flow but compression remains unavailable.</td>
</tr>
<tr>
<td>Sea Robin Pipeline Co.</td>
<td>9/17/08</td>
<td>Reduced flow due to damage, lack of processing and continued shut-in as inspections continue. Some offshore systems have experienced some damage that will limit a full return to service. Processing is unavailable but gas flow can commence at higher heating value.</td>
</tr>
<tr>
<td>Southern Natural Gas Co.</td>
<td>9/17/08</td>
<td>Force Majeure declared Wednesday, Sept 17 – Damage at interconnect with Sabine (Henry Hub) resulting in reduced gas flow. Repairs expected to be completed in 3-5 days.</td>
</tr>
<tr>
<td>Stingray Pipeline Co.</td>
<td>9/17/08</td>
<td>Some onshore facilities (office building) sustained water damage; offshore facilities have minor damage and crews are working to repair visual damage and will perform further inspections in the coming days.</td>
</tr>
<tr>
<td>Tennessee Gas Pipeline</td>
<td>9/17/08</td>
<td>Tennessee has confirmed leaks on its 36 inch and 26 inch mainlines on the East Leg of the Blue Water system, in Ship Shoal 156/157.</td>
</tr>
<tr>
<td>Texas Eastern Transmission</td>
<td>9/17/08</td>
<td>TE estimates that producers have shut-in 400,000 to 500,000 Dth / d of supply on its system due to Hurricane Ike.</td>

**Note:** Storm column indicates hurricanes impacting processing plant: G = Gustav; I = Ike; G+I = Both storms, M = Maintenance, and - = no impact

**1** “N/A” (Not Available or Confirmed) identifies those plants that are in the path of Ike that have not yet been confirmed of their status.

**2** The capacity represents the design capacity of the plants and does not represent the actual gas flow through these plants.

**3** Confirmed plants capable to restart after electricity is restored or when upstream gas flow commences service.

**The Matagorda processing plants has been idle (mothballed) prior to Hurricane Gustav/Ike.**

**Sources:** Confirmed by company or on company web site. Various trade press sources

Total utility customers are based on field reports.
Note: due to a large number of service providers, including investor owned utilities and cooperatives, the number of customer outages reported may not be comprehensive.

- As of 8:00 AM EDT September 18, there are 1,637,268 customers reported without power in Texas.

Additional State Reports:

- In Louisiana over 1.4 million customers have had power restored following Gustav and Ike. Entergy reports that remaining Gustav damage to the transmission system includes 11 lines and 6 substations out of service. As of 6:00 AM EDT September 18, there are 22,980 customers without power:
  - Entergy 10,477 customer outages, which includes 6,310 remaining from Gustav
  - SWEPCO 426 customer outages
  - CLECO 489 customer outages
  - Cooperative utilities have a combined 11,588 customer outages

- Ike caused major power outages in Arkansas and parts of the Midwest, Ohio Valley and Northeast. Power has been restored to nearly all customers in Illinois, Missouri, and West Virginia. Remaining outages as of 8:00 PM EDT September 18:
  - Ohio – 536,270 outages, 10 percent of total customers
  - Kentucky – 189,740 outages, 9 percent of total customers
  - Indiana – 38,800 outages, 1 percent of total customers
  - Pennsylvania – 19,076 outages, less than 1 percent of total customers
  - Arkansas – 1,182 outages, less than 1 percent of customers
  - New York – 876 outages, less than 1 percent of customers
Restoration Updates:

- As of 9:00 PM EDT September 17, CenterPoint has restored power to over 832,000 customers. Centerpoint issued estimated restoration dates shown on the map below:

![Estimated Time for Completion of Substantial Restoration Map](image)

- CenterPoint reports that 8,000 mutual assistance crews plus 4,200 internal crews and contractors are involved in the restoration.

- Restoration updates from CenterPoint as of September 17 include:
  - 96 percent of transmission circuits and 93 percent of substation capacity are back in service
  - All but six substations are back in service; five of which are located on Galveston Island
  - After receiving Department of Energy approval, CenterPoint Energy established an emergency transmission connection to Entergy, which restored two substations, in order to restore power to a water treatment facility normally served by Entergy. This facility is critical to the water supply for the City of Houston
  - All transmission connections between CenterPoint Energy and the rest of the ERCOT network
  - Most of its large industrial customers at transmission voltage including the Houston Ship Channel energy and petrochemical companies
  - 52 of 77 area hospitals
  - 52 of 80 water pumping stations
  - 117 of 245 sewer lifts
- Restored service to City of Houston METRORail (Light Rail)

- **ONCOR** expects to have power fully restored by the end of the week.

- As of 6:00 AM September 18, Entergy reports transmission outages caused by Ike include:
  - 141 of 237 transmission lines
  - 186 of 378 substations
  - 132 transmission structures destroyed, and 205 damaged

- Entergy reports estimated distribution system damage caused by Ike include:
  - 6,426 poles
  - 2,664 transformers
  - 4,153 cross arms
  - 5,355 service connections damaged or destroyed, and
  - 9,368 spans of wire knocked down.

- Entergy reports remaining Gustav damage includes 11 of 241 lines and 6 of 354 substations out of service.

- Entergy reports that expected return to service today (September 17) of Entergy’s Lewis Creek plant near Willis, Texas, combined with transmission repairs, will allow Entergy in its area north of Houston to serve 10 times more customer load than is currently possible and avoid potential rolling blackouts.

- The loss of generation from Entergy’s Sabine plant due to flooding from Hurricane Ike's storm surge resulted in a generation shortfall in the Western region of Entergy Texas, Inc.’s territory. Until damage to the plant can be assessed and restoration time can be estimated Entergy is balancing system load and generation. Flood waters at Sabine have receded and safety assessment and environmental clean-up has begun.

- In Texas, Entergy restoration estimates by area are:
  - September 21 - Orange, Vidor
  - September 22 - Navasota
  - September 23 - Port Arthur, Port Neches, Nederland, Groves
  - September 29 – Woodville, Silsbee, Lumberton, Kountze, Conroe, Huntsville, Madisonville
  - October 5 - New Caney, Cleveland
  - October 6 - Beaumont, Bevil Oaks, Sour Lake
  - Flooded – no date determined- Taylor Landing, Bolivar Peninsula, and Sabine Pass

- In Louisiana, about 4,000 customer outages remain inaccessible due to flooding. Entergy restoration estimates by Parish are:
  - September 17 - Assumption, East Baton Rouge
